

Parents: if you have more than 1 child logging in & out of Seesaw

The instructions below walk you through how to create a QR code for each child so that you can simply scan in each time you want to login for a child instead of having to enter the code provide by the class teacher each time.

Steps to make the SeeSaw QR code:

1. get the code sent from the teacher
2. go to this website: <https://www.qrcode-monkey.com/#text>
3. enter in hslc::
4. enter in the code from the teacher.
- example: if the teacher sent on TNNO BIVW XCRR then you would enter hslc::TNNOBIVWCRR into the qr code monkey website
5. click on create qr code

You can then download the picture, print it off, etc.

We found that if you have multiple kids, it is a pain to log out and re-enter in the code each.

If you print a QR code for each child and print them off, you can simply sign out and then scan when switching between kids.
